Hello Det. Sgt Dean,

We have completed your map for the locations, is there a time we can meet for 30-45 minutes next week to go over the Deployment Plan? I am very free Monday and Wednesday. Let me know if we can schedule it then. Thanks!

Taige Foley

Hello Det. Sgt. Dean,

I hope you had a Merry Christmas and a Happy New Year! I know the holidays are a busy time, but now that they are over, I would love to connect to discuss the locations that you wanted us to map out. Do you have a day during the week of 13 January - 17 January where we can connect via zoom for 30-60 minutes to discuss this location? If you let me know the date/time, I can book it and send out a calendar invite.

I am also working on getting Marlborough access for their cameras so you can view them. I will have an answer on that by the end of the day.

Thanks, I look forward to speaking with you!

Ok, great. So I'd like to plan on 16 cameras, for now. Hopefully, we can get more down the road. In the meantime, let's remove these ones: 12, 18, 42, 43, and 44. Also, I'd like to move 1 camera to Lexington St SB near the Lexington border. We can move camera 21 there. If Watertown PD ends up placing a camera on Route 20 near the Waltham line, we can move Camera 11 there.

Do you know if Lexington plans on getting cameras, too?

Thanks,

Pat

Hello Det. Sgt. Dean,

I just wanted to follow up on the locations for the LPR that you guys are thinking of adding. If you could get me those locations, I can get the mapping team to work on those immediately. Once we get the final word, this would speed things up quickly.

Do we have an update on the project from the command staff side? Do we have a tentative date for when this could get approved? Please let me know if there are any updates on this!

Again, the sooner we get the locations, the quicker we can get them mapped and move the process forward. Please let me know if you have any questions. Thanks!

Hello Sgt. Dean,

I have attached the Quote for 16x LPR cameras from Flock. In the quote, you'll find the price for the LPR cameras is \$48,000 (\$3,000 per year per camera) and there is an installation fee of \$5,400 (\$3,900 + \$1,500) for the project. That puts the total at \$53,000. I have spoken to my Director, and we have been authorized to WAIVE the installation fees of \$5,400, if we can get the deal signed by the end of March (March 31st, 2025). This would allow you to get the 16 LPR cameras for \$48,000, with no other fees required. Please let me know if you have any questions, or need any clarification.

Subject: Flock Safety and Cambridge PD: ALPR Passed by Cambridge City Council

Hello Chief O'Connell,

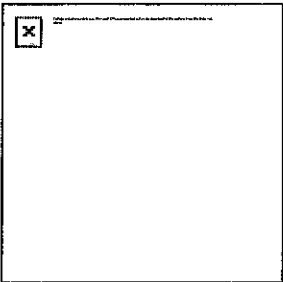

I hope all is well! I wanted to reach out to you directly to share some very exciting news for the region. On Monday, 2/3, the Cambridge City Council **PASSED** a motion to allow ALPR technology into Cambridge. The Council voted 6-3 to allow ALPR in Cambridge, and you can read about it **HERE**. The City Council ultimately realized that without this technology, they are putting their citizens and residents at a disadvantage and believe that ALPR in Cambridge will allow for the Police Department to more effectively and efficiently solve crime.

I would love to discuss how we were about to help the Cambridge PD create a proposal to the City Council which focused heavily on Public Safety and keeping residents safe and protected. We were able to do this in a few ways that I would love to share with you:

- **Community Affairs Team:** We provided Cambridge PD with access to our Community Affairs team, which helped them craft the language to focus on public safety and overall improvement of safety in Cambridge.
- **Showcasing what Flock does, and what we don't do:** We showcased the power of the Flock Public Safety Technology, but also focused on our values of Privacy (No facial Rec, Auditable Searches, not "running" every plate).
- **Partnership:** We worked hand-in-hand with Cambridge to ensure they were prepared for Council, and will continue to work with them through the whole process.

This is exciting news for Policing in Massachusetts. I would love to follow-up with you on this and how we can replicate the process in Waltham. If you have some time over the next couple of weeks, I would love to set up a time to discuss how we were able to help Cambridge over Lunch. Please let me know if this is something we can set up. I look forward to hearing from you, and please don't hesitate to reach out!

Subject: Flock Safety and Cambridge PD: ALPR Passed by Cambridge City Council

Hello Chief O'Connell,

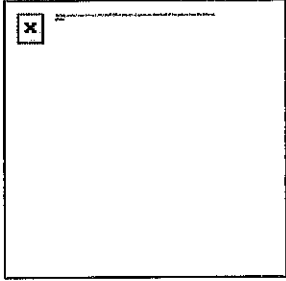

I hope all is well! I wanted to reach out to you directly to share some very exciting news for the region. On Monday, 2/3, the Cambridge City Council **PASSED** a motion to allow ALPR technology into Cambridge. The Council voted 6-3 to allow ALPR in Cambridge, and you can read about it **HERE**. The City Council ultimately realized that without this technology, they are putting their citizens and residents at a disadvantage and believe that ALPR in Cambridge will allow for the Police Department to more effectively and efficiently solve crime.

I would love to discuss how we were about to help the Cambridge PD create a proposal to the City Council which focused heavily on Public Safety and keeping residents safe and protected. We were able to do this in a few ways that I would love to share with you:

- **Community Affairs Team:** We provided Cambridge PD with access to our Community Affairs team, which helped them craft the language to focus on public safety and overall improvement of safety in Cambridge.
- **Showcasing what Flock does, and what we don't do:** We showcased the power of the Flock Public Safety Technology, but also focused on our values of Privacy (No facial Rec, Auditable Searches, not "running" every plate).
- **Partnership:** We worked hand-in-hand with Cambridge to ensure they were prepared for Council, and will continue to work with them through the whole process.

Hello Gentlemen,

I have sent the Deployment Plan to Sgt. Dean, but wanted to update you on some events in your area. Cambridge City Council APPROVED their STIR for ALPR in Cambridge last night, but a count of 6-3! This is great news for the region, and over the following weeks we will work to get Flock LPR into Cambridge. I also got word that Watertown will be bringing their ALPR proposal to their City Council here very soon. Great momentum in your area, so I look forward to moving forward with our partnership! Please let me know if you have any questions!

Det. Sgt. Dean,

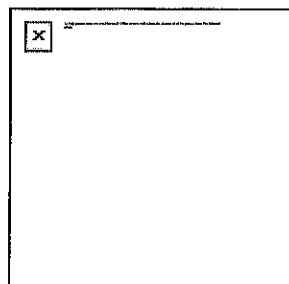

I have attached a 2-year contract and the Master Service Agreement. Please feel free to have your legal team review it. If they need more information, I can gladly provide it.

You will see in the contract, I was able to get my Director to waive installation, which saved the City \$5,400, but I have been informed that I will only be able to waive that if we can get the deal started by April 30th!

I am working on the location packet for you!

Let me know if you have any questions or need anything else!

Hello Sgt. Dean,

I just wanted to check in on the project in Waltham, and see if there was any support you needed. I just had a call with Cambridge yesterday, and they are looking to close their deal by the end of March so they can get them in the ground by the Spring. Watertown is also looking to add their cameras in March/April. Let me know if you have any updates, or need anything from me to get the process rolling. I can pull in my Director and reach out to Chief if needed!

Sent: Tue, 18 Mar 2025 14:18:59 -0400
To: "Dean, Patrick" <pdean@police.waltham.ma.us>
Subject: Project Prove It - Waltham, MA

Hello Sgt. Dean,

I wanted to follow-up our discussion with the information about the "Project Prove It," which allows for you to implement Flock Technology with an Out-Clause built in. The details are as follows:

A PPI allows for you to emplace flock LPR on a trial basis, with an out clause to remove the technology. The two things required for a PPI are a signed Deployment Plan (which is what Sgt. Dean is working on now) and a signed contract. That contract has a build in Out-Clause that reads:

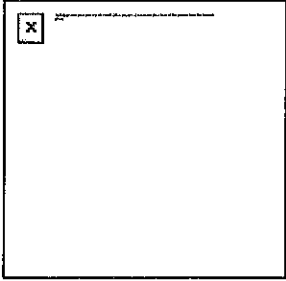

PROJECT PROVE IT: Customer will have a "45" day opt-out period ("Opt-Out Period") after implementation of the first Flock Hardware to terminate this Agreement without penalty or fees. After the Opt-Out Period, Customer may not terminate the Agreement, and Customer will pay any invoice(s) for the remainder of the Term, Net 30.

How this would work:

1. Waltham Signs the PPI Contract
2. It will take 4-6 weeks to install LPR
3. **Once the installation takes place, the 45-day PPI starts**
4. **Anytime with in those 45 days, you can cancel the contract** for 2 reasons
 - 4A. PPI Contract - You can cancel at any time in those 45 Days
 - 4B. You can cancel if you do not get the funds appropriated (All Contracts have this option.
5. Once the 45 day period ends, and you want to continue with Flock, you will be invoiced and have 30 days to Pay the Invoice.

Please let me know if you have any questions. This is a great way to quickly start a LPR program with Flock without any risk, as we will take the technology back if you cancel the contract.

I look forward to hearing from you!

Absolutely,

Departments with Flock:

Malden, MA (11 cameras)
Framingham, MA (12 Cameras)
Everett, MA (7 cameras plus a plan to add)
Chelsea, MA (16 Cameras plus a plan to add our Real-time Crime Center software and our Drone)
Revere, MA (27 cameras and a plan to add more)
Boston, MA (75 cameras, some installed already, but 75 total)
(Plus Lawrence, MA (36), Lowell, MA (64), Haverhill, MA (19), Braintree, MA (10 plus gunshot detection),
Milton, MA (13).

Departments who are getting Flock:

Cambridge PD - RFP open now, closes on 4/7, but we are very confident and have been working with Cambridge for months. (16-23 cameras)
Watertown PD - 8 Cameras being approved by City (Verbal Approval and a plan to get them in soon)
We have also had discussions and are working on details with Belmont PD, Newton PD, Somerville PD, and Brookline PD (these may take a little longer due to City politics and such)

Commercial LPR Near Waltham:

Home Depot on 1st Ave - 2 Cameras
Extended Stay on 4th Ave.

Let me know if I can explain anything more thoroughly. I am available by phone today, so do not hesitate to reach out!

Subject: Fwd: Update from 4/18 Meeting

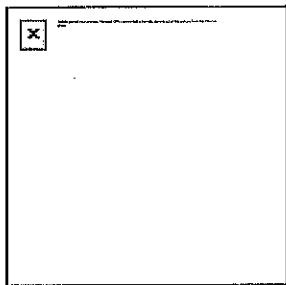

Hello Gentlemen,

I wanted to follow up with you after our discussion today. There are three things I want to go over with you!

- 1. The total cost of the two-year agreement will be \$96,000, but you will NOT have to pay the entirety up front. You will have to pay the first year (\$48,000) 30 days after signing, and then on the year anniversary of the contract signing, you will get another invoice to pay the second year (\$48,000). There will be NO other costs associated with this contract.
- 2. You will see on the locations I provided you, you will see Numbers that start with F and P (example F#001 and P#001). The F indicates the LPR Camera (F=Falcon, the old name for LPR) and the P indicates Picard - the Picard is the battery pack/Radar that is embedded with the LPR. The Picard will be on the same pole, in the same location as the corresponding LPR camera. There is no additional cost or implementation that is required.
- 3. I have attached a 2-sheeter with your 16 locations and an overall map.

Please let me know if you have any questions. I will be around Tuesday to connect. Please let me know if you need anything else!

Thank you, Jim, for the introduction.

Good afternoon, gentlemen,

I'm Pat Dean with the Waltham Police. We are in the process of procuring a contract with a company called Flock. They maintain camera systems, including license plate readers, used by many law enforcement agencies throughout the country. They also maintain the system where we'd be accessing images captured by the cameras. This system would be instrumental in increasing our investigative and public safety capabilities. We'd like to put a camera in the intersection of Third Ave and Totten Pond Road and have spotted what appears to be an awesome spot to put one—one of your very tall streetlights. I am looking for someone I can speak to about getting permission for us to use your light pole. Please feel free to call me when it's convenient for you.

Thank you very much,

Pat

Subject: BxP Contacts

Hi Detective Sergeant Dean,

CCed you'll find email addresses for Greg Dawe and Derek Wheeler – both are with BxP Safety and Security and I've had the pleasure of working with them for a few years now.

I had the opportunity to speak with Derek this afternoon and gave a very brief, cliff-notes, version of what you'll be inquiring about – but essentially Detective Sergeant Dean has been working on a project with a license plate reader company to improve public safety in the city of Waltham.

Greg and Derek- Detective Sergeant Dean will be following up to this with further info.

Best Regards,

Detective Jim McMeekin

Waltham (MA) Police Department

Subject: Waltham Locations

Hello Cpt. Maher and Sgt. Dean,

Here is the link to your map for Waltham.

[REDACTED]

Please take a look at these locations and review them with whomever from the department. If you have any questions, please let me know. The next step for these will be an email from your team stating "I approve of all 16 locations for Waltham." Once that is done, all we will need to start the procurement is a signed contract!

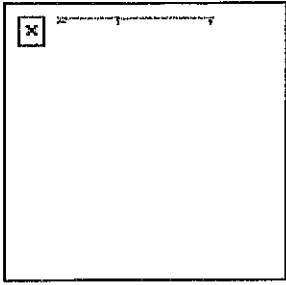

If the Chief would like to discuss anything with me, I will gladly speak with him when it fits into his schedule.

You will also find an example of a No Permit Required Letter that can be created and sent to DPW to approve the Waltham City ROW locations. I have also attached a Private Property Agreement to be signed for all the PP locations. I have also submitted a 2-pager with info on LPR.

I will connect with you this week, let me know what else I can do to help get this project rolling.

Thanks,
Taige

Hi,

Thank you for getting back to me. Yes. It is pole #2 in your attached photo. Flock would essentially clamp the camera to the pole, and it would have its own solar panel for power. I've CC'd our representative, Taige (hard g) Foley. He can give you even more information about the product. He might even be able to help you out if you wanted to put up even more cameras than the one we are getting.

In the event you do not own the pole, would you give us permission to install a 12-foot pole on the grass near the sidewalk?

Thanks,

Pat

Good morning Pat – sorry for the delay in responding but we would love to work with you on this and will do our best to get support/permission internally for this initiative. Apologies for second email if Derek has already reached out...

First, I'm assuming you are referring to one of the two poles below? If you can let us know which one (or if it's another one you are thinking of) I will first confirm that it is in fact "ours" and not something we installed during the development and turned back over to the city. Maybe it's not ours anymore! If it is ours, we have done similar things in Boston and hopefully we can get permission without jumping through too many hoops internally. I am somewhat familiar with Flock and assuming these are self-contained, solar powered cameras that would communicate over the air to you guys? Would you need any infrastructure from us other than a place to mount them? We have put up cameras and taken power from the light pole before so not out of the question if that's needed or preferred but just confirming as it certainly makes it more complicated from an install/logistics point of view. Do you by any chance have a cut sheet on what you are thinking of? Or a contact at Flock I can reach out to?

Thanks,

Greg

Subject: Grant Funding - Webinar 5/8: Grant information for Flock Safety Products!

Hello!

I wanted to reach out with a few **Grant opportunities** that can be used to **fund Flock Technology in your town**. I am going to provide information for 2 Grants that other agencies have used to fund Flock technology, including LPR, FlockOS, Trailers, Live/Recorded Video and Gunshot Detection. Both grants can be applied for and have closing dates in June of 2025.

There is a Webinar for the DOJ School Violence Grant on Thursday, May 8th at 1pm. (Details below)
HERE IS THE LINK TO REGISTER

I would love to connect with you over the next week or two about this grant. If you are interested in learning more, feel free to call, email or text and we can get some time on the calendar to discuss each grant!

DOJ School Violence Prevention Program:

<https://cops.usdoj.gov/svpp>

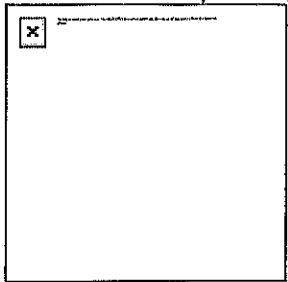

Solutions that work: LPR, Live Video, Drones, Gunshot Detection, FlockOS, Trailers and NOVA.

US DOT Safe Streets and Roads for All:

<https://www.transportation.gov/grants/SS4A>

Flock LPR and Traffic Analytics Package, as well as Trailers and Speed Trailers.

Please feel free to connect with me if you have any questions or want to learn more about these grants. This is a great way to fund Flock Technology in your town to begin solving more crime and keeping your town safe. I look forward to speaking with you soon!

Subject: RE: BxP Contacts

Hi,

Thank you for getting back to me. Yes. It is pole #2 in your attached photo. Flock would essentially clamp the camera to the pole, and it would have its own solar panel for power. I've CC'd our representative, Taige (hard g) Foley. He can give you even more information about the product. He might even be able to help you out if you wanted to put up even more cameras than the one we are getting.

In the event you do not own the pole, would you give us permission to install a 12-foot pole on the grass near the sidewalk?

Thanks,

Pat

Subject: RE: BxP Contacts

Good morning Pat – sorry for the delay in responding but we would love to work with you on this and will do our best to get support/permission internally for this initiative. Apologies for second email if Derek has already reached out...

First, I'm assuming you are referring to one of the two poles below? If you can let us know which one (or if it's another one you are thinking of) I will first confirm that it is in fact "ours" and not something we installed during the development and turned back over to the city. Maybe it's not ours anymore! If it is ours, we have done similar things in Boston and hopefully we can get permission without jumping through too many hoops internally. I am somewhat familiar with Flock and assuming these are self-contained, solar powered cameras that would communicate over the air to you guys? Would you need any infrastructure from us other than a place to mount them? We have put up cameras and taken power from the light pole before so not out of the question if that's needed or preferred but just confirming as it certainly makes it more complicated from an install/logistics point of view. Do you by any chance have a cut sheet on what you are thinking of? Or a contact at Flock I can reach out to?

Thanks,

Greg

Thank you, Jim, for the introduction.

Good afternoon, gentlemen,

I'm Pat Dean with the Waltham Police. We are in the process of procuring a contract with a company called Flock. They maintain camera systems, including license plate readers, used by many law enforcement agencies throughout the country. They also maintain the system where we'd be accessing images captured by the cameras. This system would be instrumental in increasing our investigative and public safety capabilities. We'd like to put a camera in the intersection of Third Ave and Totten Pond Road and have spotted what appears to be an awesome spot to put one—one of your very tall streetlights. I am looking for someone I can speak to about getting permission for us to use your light pole. Please feel free to call me when it's convenient for you.

Thank you very much,

Pat

Detective Sergeant Patrick Dean

Subject: BxP Contacts

Hi Detective Sergeant Dean,

CCed you'll find email addresses for Greg Dawe and Derek Wheeler – both are with BxP Safety and Security and I've had the pleasure of working with them for a few years now.

I had the opportunity to speak with Derek this afternoon and gave a very brief, cliff-notes, version of what you'll be inquiring about – but essentially Detective Sergeant Dean has been working on a project with a license plate reader company to improve public safety in the city of Waltham.

Greg and Derek- Detective Sergeant Dean will be following up to this with further info.

Best Regards,

Detective Jim McMeekin

Cpt. Maher,

LOVE to hear that. I will work with Pat tomorrow after we get the contract to schedule our handover meeting with my team. That will get us set up with training, setting up usernames and passwords, and most importantly I will connect you with the project manager for your deployment so we can start working on getting these into the ground. I will have more information and a better understanding of the timeline once I get the contract in the system.

I am looking forward to getting you started! I will speak with Pat tomorrow and we will get this project rolling! Exciting news!

Taige,

We got the go ahead for FLOCK – the money has been authorized here. Chief O’Connell has signed off on the contract. Pat Dean is on day off. Pat will be back in Thursday 3 to 11. My plan is for him to talk with you at 3 when he comes in and forward you the contract and whatever you need at this point. Please talk with Pat about any outstanding paper works that needs to be completed if any.

Looking forward to getting this going – hopefully after you talk with Pat Dean Thursday when he comes in you'll be able to let us know the next steps and time lines for installation of cameras etc. The more information shared the better I like to keep our detectives and command staff updated on everything I can. Updates are GREAT.

Cpt Maher,

I just asked my team to provide me with some of the policies. So I will send any over that I get. I was able to get a Sample LPR Policy from the Town of Stow. This can be used by Waltham as a shell for their LPR policy. You can even edit it on the document. I have attached that. Let me know if that helps.

Subject: Add Live Video to existing LPR for Discount

Hello Det. Sgt. Dean,

I wanted to reach out to you because over the last week or two Flock has recently launched an offer to add a **Live and Recorded Fixed Video Camera to existing Flock LPR for \$1,000 per year per camera**. I know that Waltham will have 16 LPR deployed, and if you were interested in adding Live Video to that deployment, it would cost \$16,000 for those additional cameras. This Live View camera does not need to be facing the same direction as the LPR, which could increase your situational awareness and live video coverage in your town. If your PD has any funds left over for the end of the year, this would be a great way to spend those funds.

This is an incredible opportunity to add Live Video to your Town's Public Safety Tech stack, and if you want to learn more, I would love to set up a quick 10 minute phone call to go over any questions you have. I look forward to speaking with you about adding Live View to your Flock LPR!

Thanks!
